TIGRESS™
by Bengal Bite®

WE TEND TO BE VERY PROTECTIVE™

High Performance Sports MouthWear
For Female Athletes

Bengal Bite Laboratories, LLC

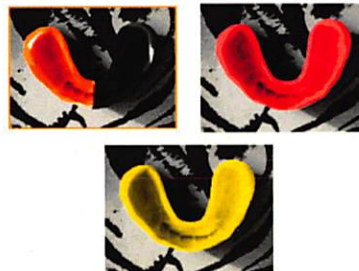

The Tigress™ by Bengal Bite® is Specially Designed for your Female Athlete

Tigress™ is a revolutionary mouthpiece developed by Dr. Jeffrey R. DeMartino for both professional and amateur athletes to prevent serious sport injuries. Each mouth piece is individually created for a comfortable and effective custom fit. The Tigress™ by Bengal Bite® design includes an extra soft cushioned liner specifically engineered to conform to a female's distinctively more rounded cusped teeth. This greatly enhances the retention of the mouthpiece, and ultimately its precise fit and stability. The tight, but flexible fit means they don't move, and you don't restrict your breathing. This extra soft liner was also engineered to protect against common and minor, but yet very unsightly, chips in the naturally thinner incisal edges of the female athlete's front teeth. The Tigress™ by Bengal Bite® high energy impact absorbing outer shell is designed and created on a custom dental articulator to interdigitate intimately with the lower, more slender mandible of a woman.

The Tigress™ Mouthpiece by Bengal Bite® is Fiercely Protective Gear® against Concussions and CTE

Tigress™, the ultimate custom-fit mouthpiece, is trusted by professional athletes to help prevent injury to the jaw, teeth, neck, head and brain. Concussions have become a common injury amongst athletes in a variety of sports. Chronic traumatic encephalopathy (CTE) is a progressive degenerative disease found in individuals who have been subjected to multiple concussions and other forms of head injury. CTE has been most commonly found in athletes' participating in contact sports, who have experienced head trauma, resulting in characteristic degeneration of brain tissue. Individuals with CTE may show symptoms of dementia such as memory loss, aggression, confusion, and depression which may appear within months of the trauma or many years later. A majority of concussions go untreated and athletes continue to participate in their sport without even realizing they have been seriously injured. Studies show that High Performance MouthWear can protect your female athlete from both concussions and CTE.
